Day 3: Reason #2 Why You Haven't Won the Lottery - "Away From" Motivation

Today we're going to focus on an extremely common and serious mistake made by most of us when using the Law of Attraction (or any kind of mind power, energy healing, or manifesting technique or process) to win money. In fact, this mistake is so prevalent that I see other healers and Law of Attraction teachers and coaches make it all the time.

In short, one of the most common reasons that the Law of Attraction "doesn't work" is because you are trying to use it from what is called "away-from" motivation. (This is a term from NLP, or neuro linguistic programming.) What that means is that you don't want something because you really want that thing, but because you think it will eliminate or prevent some problem or bad thing you don't like.

For example, let's say that you want to use the Law of Attraction to win the lottery. If I ask you why you want to win the lottery, you might give one or more of these reasons –

- 1) I want to win the lottery because I hate my boss/job/co-workers and if I win the lottery I never have to go back there.
- 2) I want to win the lottery because I'm massively stressed out about money/bills/debts, and if I win the lottery I can pay all my bills and clear my debts and never worry about money again.
- 3) I want to win the lottery because my house/apartment/living situation totally sucks, and if I win the lottery I can move out and never have to deal with it again.

What you'll find is that the vast majority of the reasons people want to win money involve avoiding or getting rid of some problem or bad thing in their lives. This is what "away-from" motivation means: you are motivated to get something by your desire to move away from, avoid, or eliminate something bad.

Unfortunately, away-from motivation just doesn't work, or the world would be full of Law of Attraction millionaires! Instead, most people want to win money to get away from some problem

or other bad thing, and sadly manifesting this way with an “away-from” motivation only reinforces their problems and can even make them worse.

So how could using the Law of Attraction to win money actually make your situation worse? Remember that the essence of the Law of Attraction is that whatever you focus your thoughts and energy on will be attracted to your life and get bigger. Unfortunately, when you are motivated by “away-from” motivation, what you’re really putting your energy into is the resistance of the bad thing you want to avoid or eliminate.

For example, if you really hate your job, you may be motivated to take a wealth-building seminar and make a wish board to help you manifest winning the lottery so you can afford to quit your job. However, what you don’t realize is that what you’re really focusing your energy on is your resistance to your job and how much you hate it, and so unfortunately your manifestation reinforces and even expands your experience of hating your job. As a result, this “away-from” motivation has actually decreased your chances of winning the lottery, which is exactly the opposite of what you were trying to do – oops!

Quite simply, I estimate that 99%+ of people who use some form of Law of Attraction process to get more money are doing it from an energy of away-from motivation, which usually has exactly opposite the intended effect. So is it any surprise that less than 1% of people have success with typical Law of Attraction techniques?

Instead, you’ll get much better results if you can align with a “towards” motivation, which means that you use a manifestation process because you want to have or experience something good in your life, rather than using it to avoid or eliminate something bad.

For example, if you want to win the lottery because it’s always been a dream of yours to stand on a stage and get a huge check, that is “towards” motivation, and you may actually win!

Or, if you want to win money in Las Vegas because it’s really fun to play blackjack all night and then go cash out big stacks of chips, that is “towards” motivation, and you may actually win!

But if you want to win money so you can quit your job, or move out of your parents/kids/brothers/etc. house, or never drive your crappy old car again, don’t hold your breath – more likely than not, the efforts you make to win money are coming from “away from” motivation, and will likely only reinforce your problems.
